

Mahmoud Adas

Software Engineer - Egypt

☎ (+20) 1019-42-6003 | ✉ mahmoud.othman.adas@gmail.com | 🌐 [mido3ds](https://mido3ds.com) | 🌐 [mahmoud-adas](https://mahmoud-adas.com)

Education

Cairo University, Faculty of Engineering | Egypt

Sep 2015 - Jul 2021

B.S. in Computer Engineering

Tools

- C, C++, Go, Python, Java, Rust
- Qt/QML, React, Spring, Android
- SQLite, Docker, Linux

Experience

C++ Software Engineer

Jun 2021 - Mar 2022, Jun 2023 - Now

[Atomica.ai](#) (360Imaging) - Giza, Egypt

- Currently **team leader** for general-cad dental application
- Joined teams: [internal tooling, launcher, clients, general-cad]
- Contributed to the launcher app, the **installer** of the whole suite of products
- Developed multiple internal C++ libraries
- Developed GUI tool to modify product **cloud data**
- Developed SQLite-C++ **boilerplate generators**
- Contributed to internal core libraries used across the company
- Maintained frontend of planner & segmentations apps

Software Engineering Intern · [Cert](#)

Jul - Sep 2020

Solectra - El Gouna, Egypt

- Maintained an **embedded system** that collects and analyses data from electric vehicles to report trips, total revenue, and energy
- Fixed several bugs, improved performance and prediction correctness, and added various tests

Projects

360Launcher

Jan - Mar 2022

Qt/QML/C++ app to install/update/launch main products and integrate with them

Library Editor

Sep - Dec 2021

- C++ (+ImGui) internal tool to modify/upload versioned metadata and information
- Helps product managers update domain-specific logic without new app release

DPSX-Sync

Jun - Aug 2021

- Qt/QML/C++ experimental Dropbox-like app to add sync and collaboration features
- Uses libgit and Gitea server for versioning and synchronization

C4IAN (Graduation Project) · [Repo](#)

Feb - Jul 2021

- Tactical Mobile ad-hoc network. Supports video/audio streaming and messaging
- ZHLS+ZID unicast, ODMRP multicast, and geo-based broadcast
- **Golang** router that integrates with the Linux network stack

OpenYSF · [Repo](#)

Nov 2021 - Present

A [ysflight](#) flight simulator clone, for learning and fun. Backward compatible with ysflight assets

Apex · [Backend](#) · [Frontend](#) · [Android](#) · [Testing](#)

Jan - Mar 2019

- Reddit clone, for web and android. Took role of **Devops** in team of 18

Used Travis-CI for CI/CD, GoogleCloud, Docker, DockerCompose, and Datadog for monitoring	Jun 2019
Koos · Repo · Rust Rewrite - Decentralized social media app, built on Fluence. AssemblyScript/Rust for server, React for frontend Won a Gitcoin bounty for the best app that uses Fluence's technology	
Mini-Search-Engine · Repo Text and image search with trends detection. Used Java Spring and React	Feb - Mar 2020
Match Reservation System · Repo Web application for Egyptian Premier League for seats reservation. Used MongoDB , Nodejs and React	Jan - Feb 2021
NesEmu · Repo NES console emulator in C++. Hobby project	2019 - Present
Cartoonization · Repo - Snapchat Clone written in Python draws stickers on live recordings of faces - Implemented GUI, rendering stickers, and HOG algorithm - Used Viola-jones/Hog to detect faces, and multiple image processing techniques to filter the input	Oct - Dec 2019
RetroSoccer · Repo Multiplayer soccer game entirely in x86 IA32 MASM assembly with chat (serial communication)	Jan - Mar 2019
Simple PDP--11 · Repo - Design and simulation of a CPU architecture similar to <i>PDP--11</i> in VHDL and Vunit for test benches - Designed and implemented automated tests for the CPU	Oct - Dec 2019
TheMistake · Repo - Maze solver car using flood fill algorithm on TIVA-C_μ/Arduino-Uno with ultrasonic and IR sensors - Implemented maze-solving and tested it	Jan - Mar 2019
Paint-For-Kids · Repo C++ GUI application for kids to draw and play with shapes, with two game modes. OOP school project	Jan - Mar 2017
Outbreak · Repo Java/libgdx clone of the classic game "Outbreak"	Jun 2018
InventoryApp · Repo Android CRUD app to keep track of inventory items in a store	Jun 2018
